

Waste Disposal

Animal Disposal Procedures:

- Place animal carcass/parts in Ziploc bag.
- Label the bag with P.I. name (Dr. Andrea Fleig), date, location (University Tower 804), and number of carcasses.
- Seal the bag and put it on the bottom shelf of the -20 freezer next to Carolyn's desk.
- Collect all the carcasses on the last Wednesday of every month and put them in a red Biohazard bag.
- Have housekeeping take this bag when they pick up the other biohazard waste from the tissue culture room.
